

Due Diligence Issues for Energy Storage Companies

Overview

2021 was a historic year for global private investment in low carbon and renewable energy initiatives, and the U.S. set a record with \$105 billion deployed.¹ Demand for ESG investments was strong as a result of supportive new policies, comparatively low renewables costs, and increasing corporate commitments to reduce. Sales of solar development platforms have been a key theme in renewable energy M&A in recent years. Notwithstanding the current headwinds the industry is facing, we expect this trend to continue, albeit with a refined focus on. The renewable energy M&A market continues to be robust as a result of high demand and availability of capital but has also grown more complex in light of supply chain, Federal policy, and.
