

How to attach battery labels

Overview

There are many rules and regulations in place when it comes to applying battery labels to packages containing lithium batteries for transport. So why do you have to jump through hoops when shipping lithium batteries?

Like we mentioned above, they pose very real safety issues. It's why lithium batteries are classified as dangerous goods. If transported incorrectly. First things first: you need to know which kind of lithium battery you are shipping. There are 2 classification types of lithium batteries: lithium metal. Packing Instructions (PI) are just another piece of the battery label puzzle. They were created and implemented by the International Air Transport Association (IATA). Specifically, for. Now that you know the different lithium batteries types, you'll have a better idea of which labels your package will need. So how do you illustrate the battery material being shipped?

There's a.
