

Lead-acid battery to portable power supply

Overview

If you're looking to do any radio work “in the field”, then you'll need to think about your radio, antennas and how you're going to power your kit. In the field, without mains power, your choices are essentially batteries, or a generator. On this page, we'll be looking at battery power. The traditional 12V Leisure Battery seems to be a popular choice, as they are fairly easy to come by. These are 'deep-cycle' batteries capable of being. The capacity of leisure batteries is measured in Amp/Hours, and it's a case of calculating current usage to define how long your battery will last. Care has to be taken with batteries – risk include short circuits or damage to the casing resulting in leaks of corrosive battery acid. Also, read the instructions on how to care for your battery, to get the best performance and life.

Article Content

Charging a 1.2Ah 12V lead-acid battery with a bench power supply

1. Set your Power supply voltage knob to 1V open circuit. 2. Short the leads of your power supply, set the current knob to 0.25A 3. Unshort the leads, and Set the voltage knob to 13.8V 4. Connect the supply to the battery; + to +, and - to - 5. Go for a long walk 6. Battery is charged when the charging current drops below 0.05A

Kaiyingpower

Kaiyingpower is a oem battery manufacturers & suppliers with 23 years experience, main supply general AGM battery, lead-acid battery, deep cycle battery, and gel battery ect., Factory direct. +8613559081537 Get A Quote

Ham Radio Tech: Choosing a Battery System for ...

Power for portable operations can come from various sources, like generators, solar, wind, and batteries (the primary choice of portable operators). Lithium-ion (Li-Ion), sealed lead acid (SLA), gel cell, and absorbent ...
