Can you connect an external lithium battery to the Ecoflow river 2

Yes, as long as the battery is less than 30V than you can connect just like you would with solar. The unit uses a third conductor on the XT60 plug to differentiate between solar and DC charging, and since the the River 2 can only use 110W of solar and 100W of DC charging there isn't much point in using the more expensive XT60i connector.
