

The two holes under the solar panel are leaking electricity

Overview

Affixing solar panels to your roof has the potential to cause leaks. This is because holes need to be drilled or tiles have to be manipulated to install the solar panel mounting brackets. This means that if absolute care isn't taken when mounting the brackets, incorrect sealing leads to corrosion on a tin roof; or gaps in a. When installing solar power systems on a tiled roof, there is always that one part of the job that most installers will dread: "the grinding of the tiles.". When installing solar panels on a tin roof, the way to avoid leaks is by: 1. Making sure any holes made in the tin are properly sealed with a long-lasting, high-quality sealant 2. Metal to metal corrosion is avoided by using rubber.
